312 WEST CENTRAL AVENUE

DEATH OF HAYES WAS SHOCK TO HIS FRIENDS

Santa Fe Official Had Many Friends in Albuquerque: Was Shot While Hunting With Friends.

The death of A. A. Hayes, general freight auditor of the Santa Fe system, resulting from a gunshot wound and blood poisoning that followed the injury came as a shock to the officials of the road and to his many friends. Mr. Hayes was shot in the leg while hunting with some friends near Belen, Kansas, last Thursday, and though he was rushed to the hospital at Topeka and given every possible aid he never rallied. The poisoning from the gun shot spread through his system so rapidly that not even amputation of the wounded leg could save him and he died Tuesday evening at 9:30 o'clock. Mr. Hayes was one of the youngest and most popular officials of the Santa Fe system and his death is mourned. His rise into the railroad world was almost miraculous, for after a three years' clerkship in the office of auditor he was made freight auditor. Mr. Hayes was well known over the entire Santa Fe system, and his friends are without number.

Mr. Hayes was born in Sardinia, Ohio, January 11, 1870. He went to Topeka while a boy and was educated in the common schools in that city and attended a Topeka business college for his early business training. He started with the Santa Fe as clerk in the construction department. This was in 1894. He worked for seven years in a number of departments in the general offices when in July, 1904, he was given the position of chief claim clerk in the office of the auditor. In May, 1907, he was made freight auditor.

Mr. Hayes is survived by his mother, Mrs. Jennie R. Hayes, and four sisters, Mrs. F. E. Vincent of Chicago; Miss Daisy A. Hayes, Miss Nettie Hayes and Miss Mabel Hayes, all of Topeka.

He was a man of perfect physique, tall, fine looking and popular. Although the death of Mr. Hayes has come as a shock to officials of the Santa Fe and no immediate thought is given to the future work of the office, there must be a successor to the late freight auditor. It is figured that this office will be given to W. W. Strickland, assistant freight auditor. If the position is not given to Mr. Strickland, probably it will be taken by H. C. Fribble, freight claim auditor.

The general opinion in railroad circles, however, is that Mr. Strickland will be made freight auditor. Strickland is a competent official, and has been through the various departments of the freight auditor's office. Strickland was born October 22, 1874, in Guthrie county, Iowa. He was educated in the public and high schools of Lyndon, Kans., and entered railway service of the Atchafalaya, Topeka and Santa Fe in 1893. Since then he has been consecutively, April to June, 1899, extra relief agent, eastern and southern Kansas divisions; June to October, 1899, agent at Wil-

Hannsburg, Kan.; October, 1899, to March, 1900, assistant agent at Lyndon, Kan.; March to May, 1900, relief agent, eastern division; May, 1900, to July, 1901, agent at Reading, Kan.; July, 1901 to July, 1903, agent at Carbondale, Kan.; July, 1903, to June, 1904, agent at Hurlingham; June, 1904, to November, 1904, traveling auditor; Topeka, January to November, 1905, traveling accountant; Chicago, November, 1905, to December, 1905, chief clerk in the freight auditor; Topeka, January, 1906, to date, assistant freight auditor, Topeka.

HOOKWORM IS FOUND IN 30 TEXAS COUNTIES

Austin, Tex., Nov. 27.—The preliminary investigations of Dr. C. W. Stiles of the United States service in conjunction with the state board of health have shown that hookworm is found in more than thirty counties in Texas. These investigations were made at the university, the blind institute and the deaf and dumb institute in this city, after which Dr. Stiles went to Mississippi, where he was called on other work.

According to State Health Officer Steiner, the campaign against the hookworm in Texas has just begun. Dr. Stiles will return to Texas as soon as possible for further investigation and will make research at Agricultural and Mechanical colleges, the state normals, the orphan home and other points in an effort to determine just what the infected area is. When more complete investigation has been made the public will be informed as to the results.

The first investigations, like all others, have been made in a confidential way by the doctors, and no specific information is being given out as to the number examined, the number found infected with hookworm or anything of that character. However, it is known that hookworm was found among the students at the university and both of the other state schools which were examined here, and it is from these examinations that the conclusion is drawn that hookworm is found in more than thirty counties in this state, at least.

GOVERNOR OPPOSED TO CAPITAL PUNISHMENT

Commutes Death Sentence and Announces That No Executions Will Take Place in State During His Term of Office.

Salem, Ore., Nov. 24.—Governor Oswald West of Oregon, committed to life imprisonment the sentence of W. Haggis, who was to have been hanged today for the murder of his wife. In doing so, Governor West uttered a strong condemnation of capital punishment.

He said: "There will be no more hangings in Oregon while I am governor. The old rule that bloodshed should be expiated by further shedding of blood is a relic of barbarism, and not in keeping with the civilization of the present century."

"I actively implement for life should be the penalty for the slaying of human blood."

NEW CLUB HOUSE FOR BELEN

Bids Are Being Advertised for and It Is Expected That Handsome New Structure Will Ornament City.

(Special Correspondence to the Herald) Belen, N. M., Nov. 27.—The announcement this week that Superintendent Bussard of the reading room system of the Santa Fe was advertising for bids for a new club house to be erected at Belen was received by local railroad men with much appreciation. For some time the local men have been anxious for such a building, as the proposition of getting rooming places has become a serious one in Belen of late, on account of the large number of men who have been brought here recently. The building of a club house with accommodations for sixty men would indeed be a great help in railroad circles here and would fill a great need.

The wreck at Abo canyon the first of the week, which caused the death of two engineers, and which has resulted in the death of several others since on account of injuries received, has cast a gloom not only over the railroad men resident and running into Belen, but over the entire community. All of the unfortunate men were well known by the residents of Belen, and on this account the accident seems worse than it otherwise would.

On Tuesday evening the ladies of the Lutheran church will hold their annual supper and bazaar in Commercial hall. Arrangements are being made to accommodate a large number on that evening, the event being one of the largest in the church life of Belen.

On Saturday a public auction was held at the home of Rev. J. H. Uteach, who has recently resigned from the pastorate of the Belen Lutheran church and who leaves soon to take up his new work in Canyon City, Colo. The sale attracted considerable attention and almost everything sold well. The auction was under the supervision of J. M. Solite of Albuquerque.

Mr. Bryant and Attorney Oestreich of Albuquerque were in Belen Thursday and Friday on business connected with the Home Bond and Loan company.

Attorney H. V. Mather of Belen was a caller in Los Lunas on Thursday on matters of legal business.

Simon V. Tafaya of Albuquerque has returned to his home after spending a few days in Belen visiting with relatives and transacting matters of business.

GRAY HAIR MAKES YOU LOOK OLD

Use Wyeth's Sage and Sulphur and Your Gray Hair Will Quickly Vanish.

Gray hair is the mark of age, and nothing that can be said as to its beauty will offset the disadvantages of this mark of age set upon your brow.

Wyeth's Sage and Sulphur Hair Remedy darkens the hair and restores it to its youthful beauty. Our grandmothers and their grandmothers before them used sage and sulphur for darkening their hair. Nothing has ever been found more effective for this purpose than those two time-honored remedies, but Wyeth, a modern chemist, has combined the two with other ingredients, which makes a delightful dressing for the hair and which not only removes every trace of dandruff but promotes the growth of the hair. It also stops the hair from falling out, and makes it beautiful.

All druggists are authorized to refund the money if it fails to do exactly as represented.

Don't neglect your hair and don't resort to old-time hair dyes. Get a bottle of Wyeth's Sage and Sulphur from your druggist today, and notice the difference in your hair after a few days' use.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists.

COUNCIL MAKES STUBBORN RESISTANCE

Durango, Colo., Nov. 27.—Determined that the city council shall obey the statute of the state of Colorado and pass an ordinance calling for a special election of delegates to a charter convention as the next step in establishing the commission form of government in Durango, Charles Herr, the president of the Durango Planning Mill and Lumber company, representing the supporters of the movement, through his attorneys yesterday filed application for a writ of mandamus against Aldermen George C. Logan, James W. Jarvis, John W. Owen, Herman Hanna, John M. Mosser and Florence O'Driscoll, to accomplish the desired result.

The writ is to be argued before Judge Pike on December 5, and each alderman has been served with a notice.

The fight for a commission form of government has been on since last April when, by a vote of 4-1 to 4-7, it was adopted by the taxpayers. On June 22 the council defeated an ordinance calling for the election of charter delegates. The attorneys then filed an application for a writ of mandamus to compel the council to pass the ordinance.

Despite the effort repeated threats that they would be reprimanded, if they failed to pass the ordinance, the aldermen let it drift along until last Tuesday night, when they defeated a second ordinance calling for the election.

UNCLE SAM SELLS MUCH MORE THAN HE BUYS

American Farmer Uses \$50,000,000 Worth of Foreign Products Each Year; Twice That Much Sold Abroad.

Washington, D. C., Nov. 27.—The agricultural interests of foreign countries buy nearly \$100,000,000 worth of American manufactures and other products for use in cultivating the soil, while about \$50,000,000 worth of foreign products are annually imported into the United States for use upon American farms. The foregoing summarizes certain information recently compiled by the bureau of statistics, department of commerce and labor, in response to an inquiry upon that subject from a representative newspaper located in the great farming area of the middle west, and refers more especially to those classes of merchandise having their chief, if not exclusive use in the farming industry and does not include articles in general use, such as clothing, furniture, and miscellaneous manufactures.

Of the exports from the United States of articles required in farming, by far the larger portion are composed of manufactures, such as agricultural implements, binding twine, barbed wire, and oil cake; while phosphate rock, to be ground up and used as fertilizer, and clover, timothy and other grass seeds are among the articles exported in the natural state. In addition to the exports above enumerated as specifically for farm use, there are certain articles for which the agriculturalists of other countries draw upon the United States but which cannot be classed as distinctly for farm purposes, such as wagons, carriages, traction engines, fiber bags, pumps, etc. In such cases the bureau of statistics has no means of determining the proportion of the exports intended for farm use and they are not, therefore, included in the 100 million dollars worth of merchandise exported for agricultural purposes.

Taking up the principal exports of the class under discussion, agricultural implements head the list, with a probable total of \$40,000,000 in the year about to end, comprised of nearly \$20,000,000 worth of mowers and reapers, \$8,000,000 worth of plows and cultivators, \$2,500,000 worth of threshers, and the remainder miscellaneous farming tools and implements. These agricultural implements are exported to practically all parts of the world where man has adopted modern methods of cultivating the soil. In the great wheat fields of Russia, in the vineyards of France, in the coffee plantations of Brazil, in the rice fields of China and Japan, and in all the rapidly developing countries of the New World, including Canada, Argentina, Cuba, and Mexico. The year's exports will range from nearly \$5,000,000 to European Russia; \$6,000,000 to Argentina, and about \$1,000,000 to Canada, to about \$1,500,000 to Africa, while to the British Australasia and Oceania will be sent a total of nearly \$2,000,000, to other Oceania and Asia about \$1,000,000, and Brazil about \$200,000 worth. Even the great manufacturing countries of Europe, the United Kingdom, Germany and France, are represented in the year's exports of agricultural implements, the United Kingdom with a total of over \$1,000,000; Germany, \$2,000,000, and France, \$3,000,000.

Fertilizers of which the exports will be about \$12,000,000, during the year, are chiefly sent to European countries where long-continued use of the soils has largely depleted their natural fertility and rendered artificial fertilizers a necessity. For American phosphate rock and other fertilizers of that class Germany is the largest market, followed next by Netherlands and the United Kingdom. Another class of materials, used as cattle food, whose exports are considerable includes oil cake and oil cake meal made from cotton-seed and linseed. Of these the exports amount to about \$15,000,000 per annum, being exported mostly to various countries of Europe.

Binding twine is another article of importance in wheat-growing countries. Of that article the year's exports will be about \$6,000,000, practically all destined for Russia and other European countries. Canada and Argentina. American barbed wire exported, about \$5,000,000 per annum, goes chiefly to Canada, Australia, Argentina, British Africa, Mexico, Brazil and Cuba. In addition to these articles there are others largely if not exclusively required by farmers, such as windmills, with exports nearing \$2,000,000 per annum; and clover and other grass seeds, over \$1,000,000.

On the other hand, American farmers draw upon other countries for certain of their requirements, most of the imports, however, being articles in their natural state. The largest item shown in the imports of last year were fertilizers, including nitrate of soda, \$17,000,000; guano, manure, etc., \$10,000,000; potash salts, \$5,000,000; sulphate of ammonia, used in part as a substitute for manure and in part in the manufacture of about \$5,000,000; animals for breeding purposes, chiefly horses, nearly \$3,000,000; clover seed, \$2,000,000; and sugar beet seeds, \$750,000.

A tight feeling in the chest accompanied by a short, dry cough, indicates an inflamed condition of the lungs. To relieve it buy the dollar size of E. L. RICH'S HICKORY LEAF WHISKY. You get with each bottle a free HICKORY RED PAPER PLASTER. The plaster relieves the tightness and the plaster draws out the inflammation. It is an ideal combination for curing colds settled in the lungs. Sold by all druggists.

PRISONERS ARE WELL TRAINED IN PUEBLO

Police Officer Orders Two of Them to Wait for Him While He Catches a Third, and They Obey.

Pueblo, Colo., Nov. 27.—Many surprising things have been found in Colorado, but the obedient prisoners, who await the return of their custodian, is the latest. Yesterday afternoon while two prisoners stood unguarded on the sidewalk of South Union in compliance to his command, Detective Beatty of the police department, chased a third member of the alleged gang, caught him, then returned and picked up the other two prisoners who had waited to be jailed.

The arrests were made in connection with the robbery of the office of Dr. E. A. McFalls, an optician. Dr. McFalls caught the burglars in the act and summoned the police. Officer Beatty responded and placed Tom Wilson, Claude Miller and Charles Williams under arrest. He had started with them for the central station when Williams bolted and dashed up Union avenue.

"Don't you fellows move from this spot until I come back," yelled the officer to the other two as he gave chase to the third. He succeeded in landing the runaway and returned to find the other two still waiting. They were then marched to jail where they are being held pending an investigation of the robbery.

REYISTAS CAUGHT NEAR LAS VEGAS

Men Who Said They Lived in Mexican Republic Were Heavily Armed and May Be Revolts From There.

(Las Vegas Optic.) Carrying heavy revolvers which they discharged at intervals, three strange men were arrested early this morning near Azul by Deputy Sheriff Enrique Sena. Sena's attention was attracted to the men by the sound of their revolvers. He is inclined to believe they were firing at him, although none of the bullets came close to him. The men declare they are residents of Mexico. Officers here are inclined to believe they were on the way to join a band of Reyistas, who are conducting a revolt against the Madero regime.

The men gave their names as Pri-

Send for the KC COOK'S BOOK— It's FREE.

Every Housewife Should Have a Copy

The Cook's Book has been prepared at a cost of many thousands of dollars, in the interest of better and healthier cooking. It shows the way to reduce the cost of living, containing as it does over 90 thoroughly tested, tried and proven recipes that will be *useful every time*, if the few simple directions are followed.

This is truly a wonderful book, showing as it does in hundreds of ways how to lighten the good housewife's burdens and solving bake-day problems successfully. It really must be seen to be appreciated, for the recipes are illustrated in natural colors. Those who have seen it, immediately say: "It's the best Cook Book I've ever seen"—and you will too.

You can secure a copy of this valuable book absolutely free by attaching the colored certificate packed in 25-cent cans of K C Baking Powder to this advertisement, sending both to the Jagers Bros. Co., Chicago, Ill. Write your name and address plainly.

mo Tapia, Juan Gomez and Leopoldo Ancora. They said they were on their way from Denver to El Paso. The men will be held under a charge of carrying deadly weapons and probably will be indicted by the grand jury, which is now in session. Officer Sena and a companion were on their way to Los Alamos when they discovered the three strangers. The men acted in such a suspicious manner that they will be investigated closely. It is thought they may have been contemplating committing a serious crime or were endeavoring to escape from some penal institution or the clutches of officers in Raton or Trinidad.
